

Manvi Jain

+91-7017829600 | jainmanvi004@gmail.com | LinkedIn | GitHub | Agra, India

Education

Dayalbagh Educational Institute Agra, India
Bachelor of Technology – Electrical with Computer Science; CGPA: 8.29/10.0 Aug 2023 – May 2027

Dayalbagh Educational Institute Agra, India
Diploma in Electronics Engineering; CGPA: 8.61/10.0 2022 – 2024

Technical Skills

Languages: Python, C++, C, SQL, JavaScript, HTML/CSS, Bash

ML/AI: PyTorch, TensorFlow, Scikit-learn

Frameworks & Tools: Git, Linux, Pandas, NumPy, Matplotlib, OpenCV

Databases & Cloud: SQLite

Experience

AI & Cloud Computing Intern July 2025 – Aug 2025
AICTE – Shell India – Edunet Foundation Remote

- Developed an Electric Vehicle price prediction model using Random Forest and XGBoost on real-world datasets
- Performed data cleaning, feature engineering, and EDA using Pandas and NumPy while learning ML pipelines and cloud experimentation

Python Development Intern June 2024 – July 2024
Hankernest Technologies Pvt. Ltd. Agra, India

- Developed Python web scraping scripts using BeautifulSoup and Selenium to extract structured data from multiple websites and automate data collection tasks
- Processed, cleaned, and analyzed large datasets using Pandas and NumPy, gaining hands-on experience in Python programming, automation, and real-world data handling

Linux System Administration Intern May 2024 – Aug 2024
Genisup India Pvt. Ltd. Remote

- Assisted in Linux system monitoring and routine maintenance tasks, including checking system health, disk usage, and running services
- Wrote basic Bash and Python scripts to analyze system logs and perform regular system checks, gaining hands-on experience with Linux environments and shell scripting

Technical Projects

AI-Driven Rural Healthcare Platform | *React Native, FastAPI, PostgreSQL, Docker, WebRTC* 2024

- Developed a telemedicine application enabling real-time video consultations with backend services for patient records and appointments
- Gained hands-on experience with Docker containerization, REST API development, and backend integration

Face Recognition Authentication System | *Python, OpenCV, PyTorch, SQLite* 2024

- Built a face recognition-based authentication system using OpenCV and deep learning models in PyTorch
- Stored user data in SQLite and tested the system under different conditions to improve recognition accuracy

AI Desktop Voice Assistant | *Python, Speech Recognition, NLP* 2024

- Developed a voice-controlled desktop assistant using Python and speech recognition libraries
- Implemented basic NLP-based command processing for tasks like web search and weather updates

Dual Axis Solar Tracking System | *Arduino, Embedded Systems* 2023

- Designed a dual-axis solar tracking system using Arduino, LDR sensors, and servo motors
- Improved solar panel efficiency by enabling automatic sun tracking

Achievements & Certifications

Achievements: National Semi-Finalist, Flipkart GRiD 7.0

Certifications: Python Essentials I & II (Cisco), C++ & Python (GeeksforGeeks), Digital Manufacturing Bootcamp, NCC 'A' & 'B' Certificates
